RE: Mining Operations
in the State of Utah

Gentlemen:

A notice has been forwarded to our office that you may be conducting mining operations in the State. Accordingly, it is necessary for you to file a mining and reclamation plan with the Division of Oil, Gas, and Mining and to have it approved prior to beginning activities. The staff of the Division is available for consultation should you require assistance in its development. A copy of the Mined Land Reclamation Act has been included for your information. Please desist from further mining activity until you have contacted us or you may be liable for further action involving fines and court suit.

Should your operation fall into a special exemption category, you may be eligible for a waiver from these responsibilities. This would be dependent though on certain particulars concerning the acreage of surface disturbance and the amount of material mined. Again, please call our office at your first opportunity to discuss the matter.

Sincerely,

THOMAS N. TETTING
ENGINEERING GEOLOGIST

Enclosure

cc: John Blake, State Lands
